

# Outcomes of the Cross-border Stakeholder's Workshop

Spain and Portugal – IEO & UAVR

# Galicia Bank-Vigo and Vasco da Gama Seamounts - *Case study workshop*

- **Place and date:** Vigo (Spain), - November 28<sup>th</sup> 2018.
- **Organizers:** Spanish Institute of Oceanography (IEO), the University of Aveiro (UAVR), the Center for Experimental Studies and Public Works (CEDEX) and the Technological Center of the Sea (CETMAR)
- **Language:** Portuguese and Spanish
- **Participants:** 32 stakeholders from both countries clustered around 6 sectors with potential interests in the study area:
  - (1) Conservation
  - (2) Marine Research
  - (3) Fisheries
  - (4) Navigation
  - (5) Energy and Mineral Resources and
  - (6) Renewable Energies

# Methodology

The workshop was held in a unique day session divided in 4 parts:

- I. **Plenary talks**: Presentations by coordinators from the project and the representatives of MSP authorities from the two countries.
- II. **Exercise 1**: Organised in four round-tables were set up with 2 participants from 2 sectors ( + research and conservation) focused in identifying :
  - a) Synergies
  - b) Conflicts
  - c) Gapsbetween uses that might arise in the area.

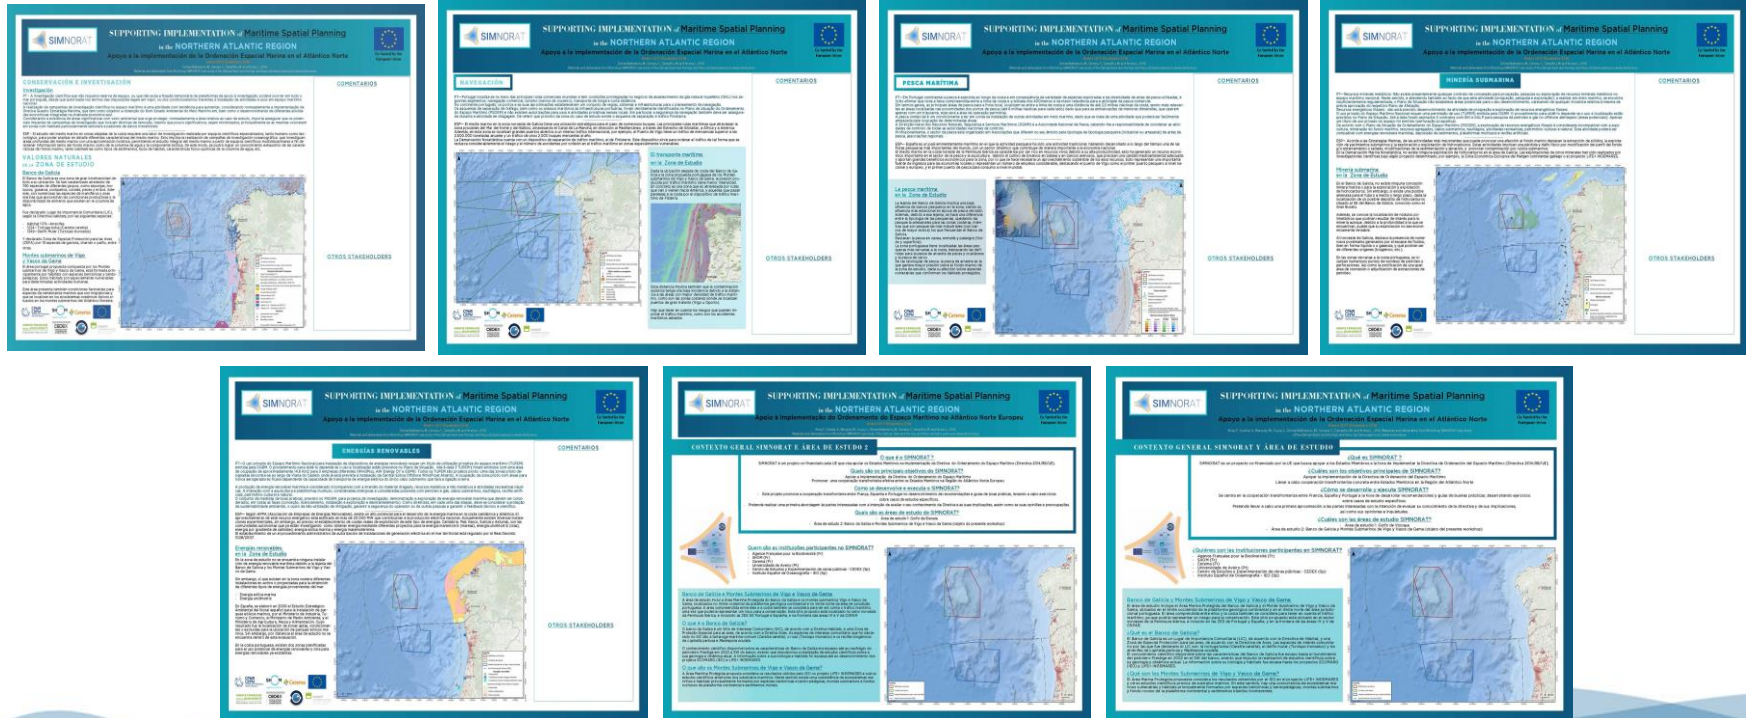

Participants had their activities (fisheries, renewal energies, etc.) mapped on paper and transparencies, which allowed them to make notes and draw on the maps, as well as overlay the information of different sectors.

- I. **Exercise 2**: Find solutions for the identified conflicts.
- I. **Plenary session**: Summarize and unify main conclusions.

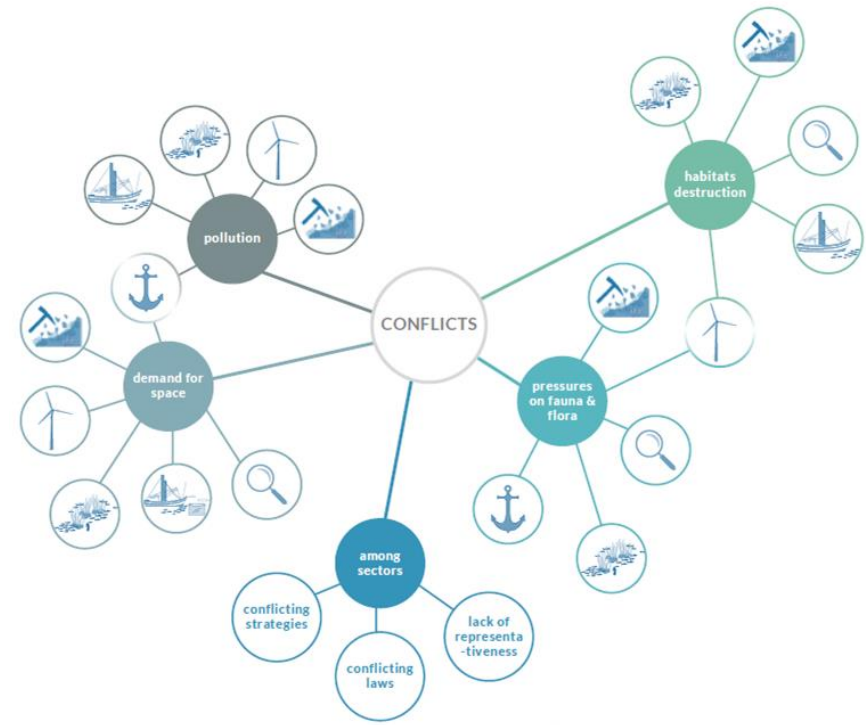

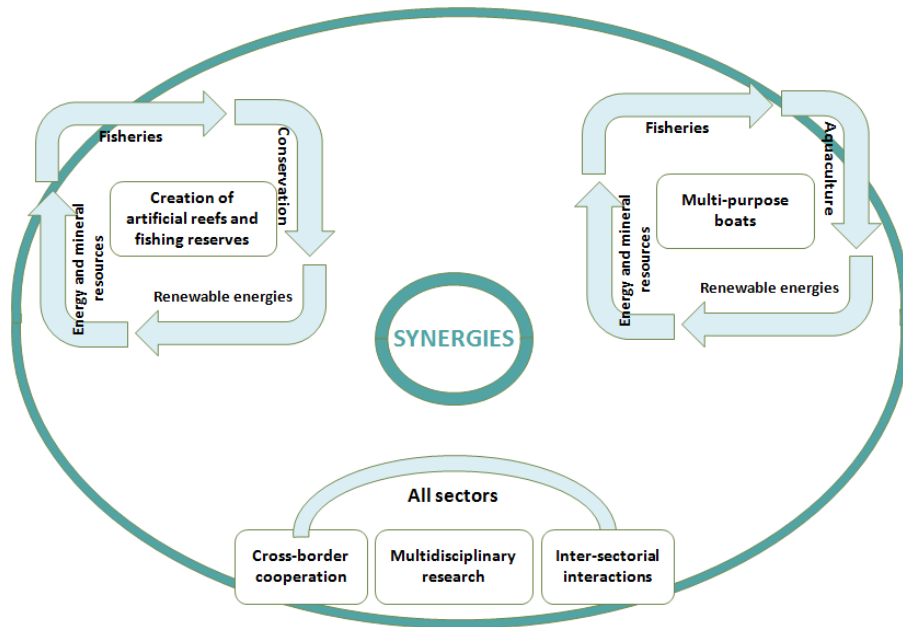

# Materials

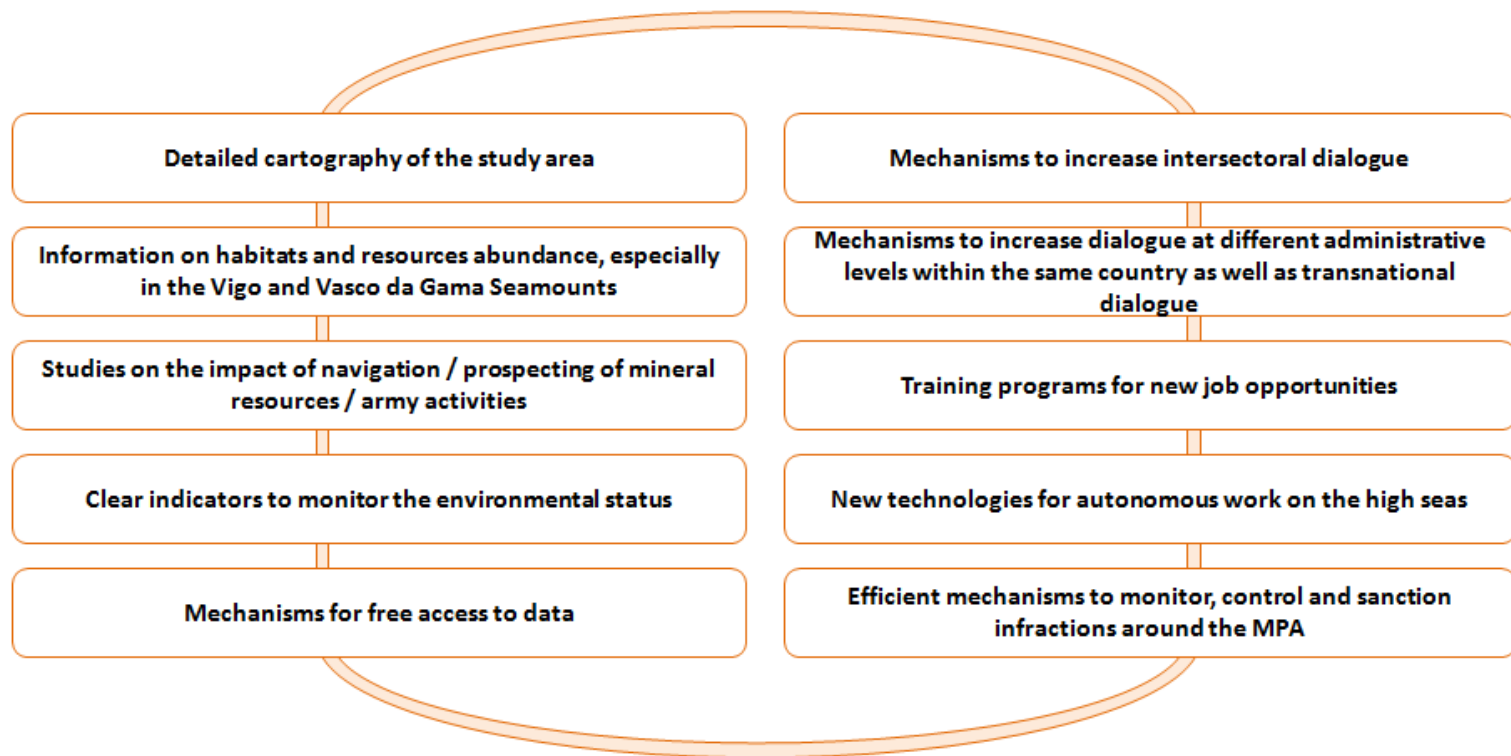

- Factsheets of maritime sectors in different sizes printed in paper and transparencies:

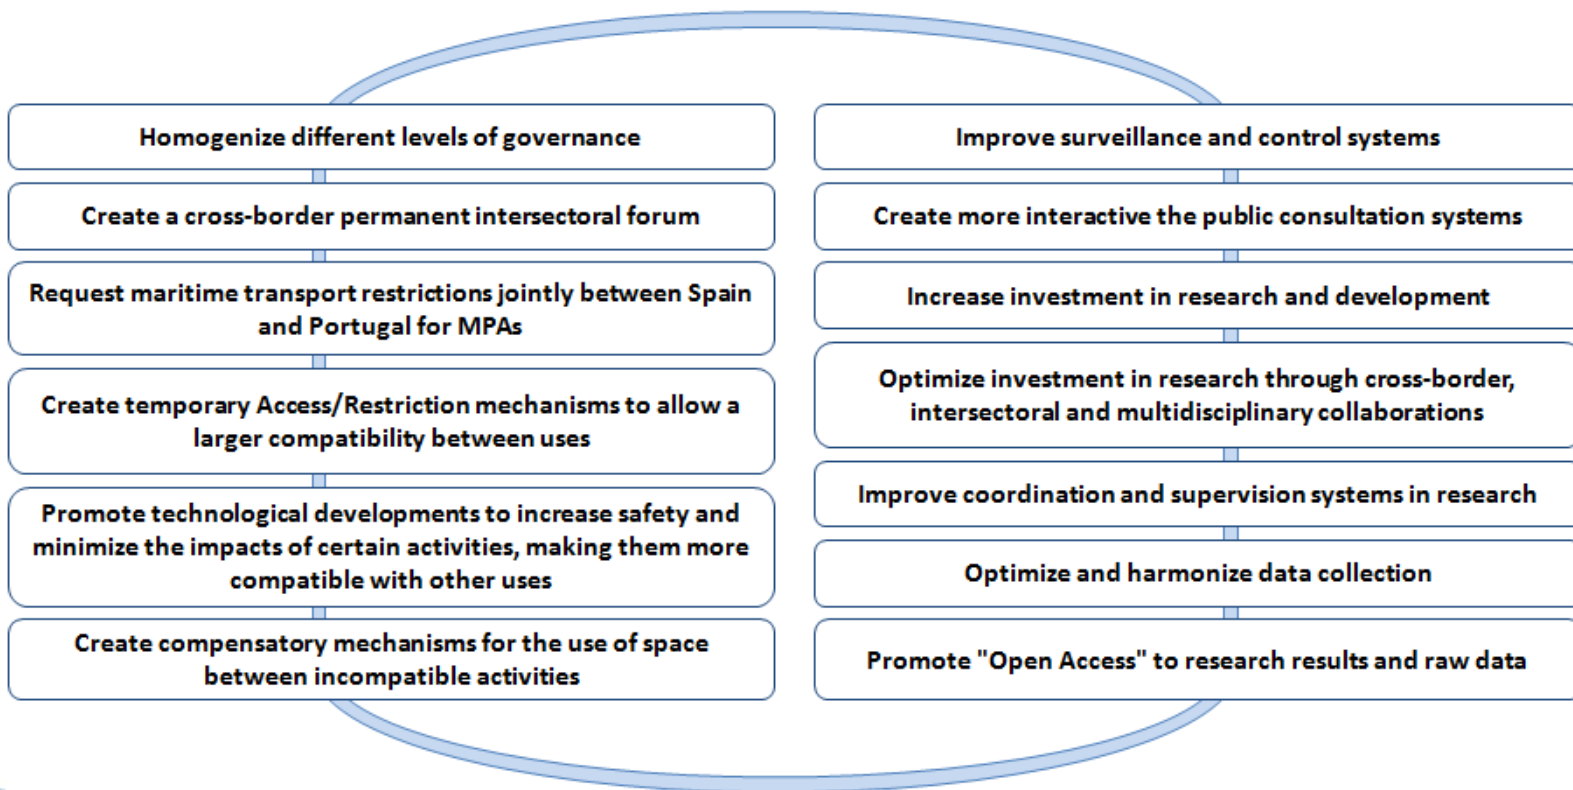

# Main conclusions: Synergies and Conflicts

# Main conclusions: Gaps

# Main conclusions: Solutions
